Consumer Credit Disclosure - OCR Review Fixture

Credit Score: 76B

Source: Synthetic Bureau

Score Range: 300 to 850

Status: Requires validation

This page is intentionally image-only so LexaVault must use OCR.

The explicit Credit Score field is non-empty, but 76B is not a valid three-digit score.

The OCR sensitive-field safety guard should therefore create an unresolved review signal instead of silently exporting the package.

Expected application result: Needs Review.
